**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 9-11, 13 and 16-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7, 21, 39, 41, 42, 46 and 48 of allowed application 10/200794. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 42 of the allowed application "anticipates" application claim 1. Accordingly, application claim 1 is not patentably distinct from allowed application claim 42. Here, allowed application claim 42 requires a supplying gaseous reactants to a catalyst through a needle anticipates flowing a mixture containing hydrogen and oxygen (reactants) through a conduit to generate heat. The structural attributes of claims 9 and 10 are likewise claimed in the allowed application. The electrolyzer of the allowed application dissociates water into hydrogen and oxygen. Claims 46 and 48 of the allowed application anticipate claims 17-19 of the application as they control the ratios and flows of the elements of the reactants.

### ***Drawings***

The drawings are objected to under 37 CFR 1.84. The drawing is not sufficiently clear and appears to be a photographic reproduction. The examiner suggests using a photograph as per 37 CFR 1.84. Standards for drawings.

### ***Allowable Subject Matter***

Claims 2-8 and 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
